

Card #1

Clues:

1. This park has many thermal features: geysers (erupt), hot springs (hot pools that do not erupt), mud pots (bubbling mud), and fumaroles (steam).
2. This park has more geysers than the rest of the world combines. What you need for a geyser is water, a heat source, natural plumbing system, and porous rock.
3. In hot springs, the color of algae can tell you the temperature of the water. Hot water will have yellow and orange colors, while cold water will have dark green colors.
4. The park experiences heavy snowfall in the winter.

Card #2

Clues:

1. This area formed 7,700 years ago when Mt. Mazama erupted, collapsed, and created a bowl-shaped caldera.
2. The Klamath Indians thought this park's waters had healing powers.
3. With no surface inlet or outlet (no sediment flow), this area has some of the clearest and bluest water in the world.
4. This is the deepest lake in the United States; a caldera is like a crater.

Card #3

Clues:

1. The continental divide goes through this park.
2. Water on the west side of the park flows to the Pacific Ocean. Water on the east side of the park flows to the Atlantic Ocean.
3. You can climb to the lakes above the clouds.
4. This park is located in Colorado.

Card #5

Clues:

1. This park contains the largest subtropical wilderness in the United States.
2. Alligators are a common sight.
3. Early people hollowed out mature Cypress trees and created dugout canoes for transportation in the shallow waters.
4. The Kissimmee River and Lake Okeechobee are major water features impacting this park.
